# WHAT IS K-LINE?

Bring flexibility and control to the forefront of your lighting design. With three circuits built into one sleek track, K-Line lets you shape spaces exactly as you want them, from spotlighting hero products to setting the perfect mood or simply brightening the room.

Unlike single-circuit systems that treat everything the same, K-Line gives each circuit its own voice. That means you can switch, mix, and fine-tune your lighting to suit the moment – creating zones, adjusting brightness, and transforming atmosphere in an instant. The result? A space that works as hard as it looks, with lighting that's as adaptable as your vision.

Behind this flexibility is a design built with contractors and end users in mind. By housing three independent circuits within one track, K-Line reduces the need for multiple installations while maximising control. Installers benefit from a system that is straightforward to plan, configure, and expand, while end users enjoy a space that can evolve without the need for costly rewiring.

For commercial, retail, or hospitality projects, K-Line makes it easy to balance accent, ambient, and general illumination from the same track. You can highlight displays, guide movement through a space, or provide comfortable everyday lighting – all controlled separately but delivered together in one efficient system.

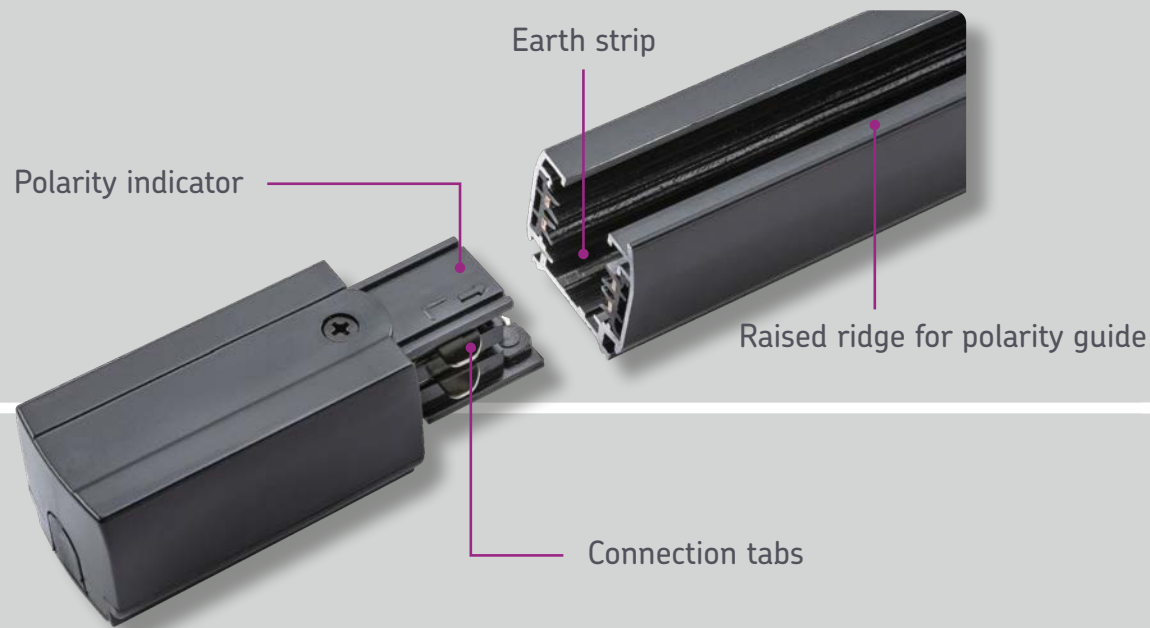

- Three independent circuits in a single track
- Ideal for commercial, retail, and hospitality spaces
- Independent switching for instant adjustments
- Efficient design that saves time and reduces hardware
- Ideal for commercial, retail, and hospitality spaces

# POLARITY MADE SIMPLE

In any track lighting system, correct polarity is essential. It ensures that the live, neutral, and earth conductors are aligned between the track body and the adapter, so power flows safely and reliably to the right components. Get it wrong, and you risk activating the wrong circuit or creating a potential hazard.

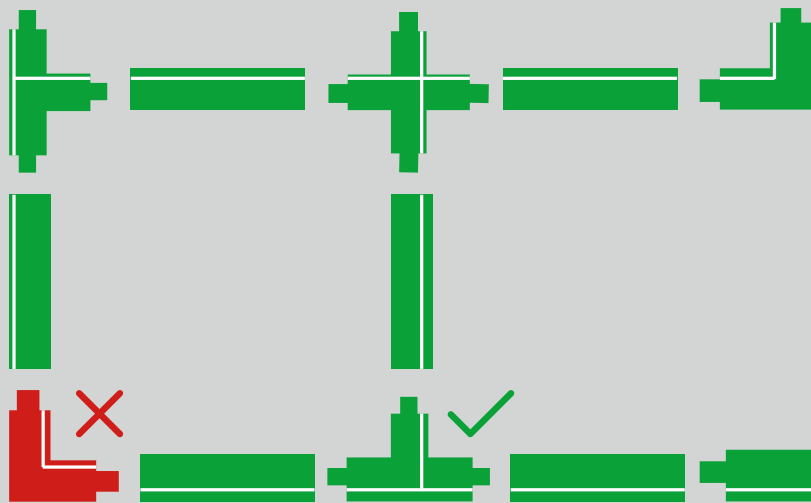

With K-Line, polarity is straightforward by design. All connectors are clearly marked with arrows and labelled “L” and “R” for left and right orientation, to be matched up with the polarity line on the track. The track itself also features a raised edge that signifies the polarity ridge - providing a simple visual and tactile guide to ensure correct alignment every time. This makes installation quicker, more intuitive, and reduces the chance of error.

For contractors, this means smoother installs with fewer risks of miswiring. For end users, it means confidence that the system is safe and reliable. With K-Line, not only do you get precise lighting control - but you also get a system engineered for clarity, accuracy, and performance.

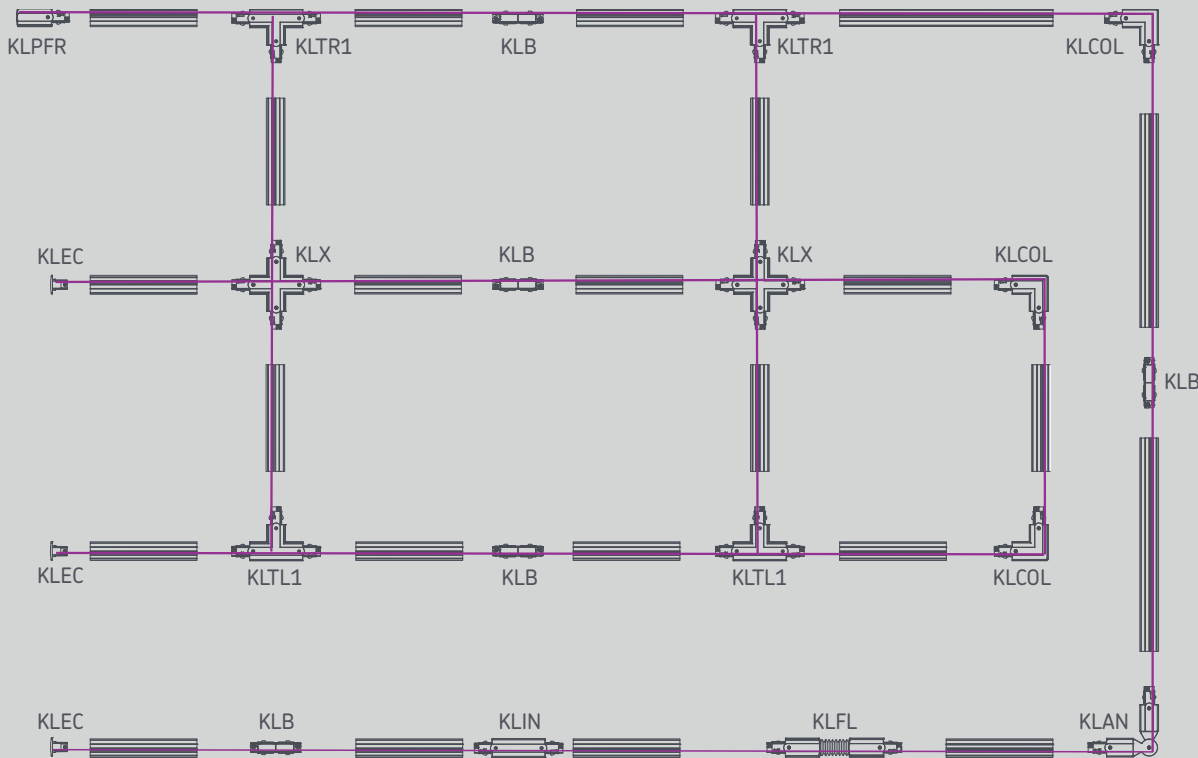

- Clear markings for quick and accurate alignment
- Polarity line and raised edge on track for quick
- Prevents cross wiring or misalignment
- Engineered for safety, reliability, and orientation peace of mind

POLARITY MAY BE THE UNSEEN DETAIL OF TRACK LIGHTING, BUT WITH K-LINE IT’S ONE LESS THING TO WORRY ABOUT.

Correct polarity is essential for safe and reliable operation. Always align the L/R arrows on the connector with the track’s polarity line - shown here in green. Incorrect alignment, highlighted in red, can result in faults or miswired circuits

Polarity is simple with K-Line: match the L/R arrows on the connector to the track’s polarity line, using the raised edge as a visual and tactile guide - ensuring safe alignment and opening the door to endless lighting configurations

Code	Finish	Description
KLSUSxx	Black / White	Track 1.5M Suspension Kit with Canopy
TRKSUS	Silver	Track 3M Suspension Kit

# 3-CIRCUIT TRACK SOLUTION

## TRACK ACCESSORIES

The K-Line track system is designed for flexibility. With a complete range of accessories, the installation can be configured to suit specific requirements, creating a versatile solution that meets both practical and aesthetic needs.

## 3-CIRCUIT TRACK

K-LINE 3-circuit track system, designed for efficient and versatile lighting solutions in commercial spaces. The 3-circuit track system provides flexible lighting control, allowing independent operation of three separate circuits, perfect for customizing illumination to suit different areas or moods within your space.

## EMERGENCY SPOTLIGHT

The 3-Circuit Emergency Spotlight is a reliable and efficient non-maintained lighting solution designed for commercial spaces. Operating only in the event of a power failure, it provides essential guide lighting to ensure safety and reassurance when it's needed most.

## LYNX SPOTLIGHT

Practical and stylish, LYNX 3-circuit track system GU10 spotlight offer a textured and sleek design, aims to be compatible with a variety of interior space, from retail to commercial. The spotlight offers adjustable, directional lighting; compatible with GU10 LED lamps, giving the end user flexibility to choose their preferred light output and colour temperature, tailoring the lighting to their exact needs.

## ATLAS SPOTLIGHT

Sleek and efficient, the ATLAS track spotlights combine performance and flexibility for retail, gallery, and office environments. Available in 14W and 24W models with black or white finishes, it delivers precise, adjustable lighting with easy installation and long-lasting durability. For added versatility, the ATLAS Pro offers dimmable functionality along with tri-wattage and CCT adjustability, allowing users to fine-tune both brightness and colour temperature to suit any space. Designed for energy efficiency and minimal maintenance, the ATLAS range provides a cost-effective lighting solution with exceptional visual performance.

## ABOUT US

Founded in 1998, Knightsbridge has grown into one of the UK's most trusted names in lighting and electrical wiring accessories. We offer a wide, competitively priced range of products – from switches and sockets to fire-rated downlights and commercial lighting solutions – designed to meet the practical needs of installers, contractors, and specifiers.

What sets us apart is our approach to customer service. At Knightsbridge, it's more than a department – it's a mindset. We aim to make life easier for the electrical trade through reliable next-day delivery across mainland UK, strong stock availability, and a product range that keeps growing in both depth and variety.

Our goal is to be a partner that the trade can rely on, providing quality, specification-ready products that help make installations safe, efficient, and hassle-free.

Whether you're already working with us or discovering Knightsbridge for the first time, we're confident you'll see why our customers keep coming back.
